# SUBJECT INDEX

## A

- Ahasic nucleosides
  - modified oligonucleotides and, 116, 118-19
- Abdominal cell fate specification
  - RNA localization in development and, 385-86
- Acceptor stems
  - ribonuclease P and, 171
- Accessory proteins
  - Golgi and endoplasmic reticulum transporters, 59
  - HIV-1 life cycle and, 1, 13-19
  - TGF- $\beta$  signal transduction and, 762-64
- Acetylation
  - nucleosome structure and transcriptional regulation, 545-73
- Acetylcholine
  - matrix proteoglycans and, 622-23
- Acetyl-CoA carboxylase
  - AMP-activated/SNFI protein kinase subfamily and, 843-44, 846
- Acetylglactosamine
  - Golgi and endoplasmic reticulum transporters, 52-53
- Acetylglucosamine
  - Golgi and endoplasmic reticulum transporters, 51-54, 56-57, 59-66
- N-Acetylglucosaminyltransferase
  - Golgi and endoplasmic reticulum transporters, 55
- Acetyltransferases
  - histone
    - nucleosome structure and transcriptional regulation, 559-63
- Acidification
  - S. cerevisiae* sphingolipids and, 39-40
- Acquired immunodeficiency syndrome (AIDS)
  - HIV-1 life cycle and, 1-22
- Actin
  - small G proteins in yeast
    - growth and, 307, 315-18
- Activation cascade
  - interferons and, 232, 238-39
- Activation energy
  - enzymatic transition states and, 693
- Active indicator
  - green fluorescent protein and, 534-39
- Activin
  - TGF- $\beta$  signal transduction and, 760-62, 765-66, 767-69
- Acyated proteins
  - caveolae and, 202
- ACT1* gene
  - Golgi and endoplasmic reticulum transporters, 62
- Adaptins
  - HIV-1 life cycle and, 14
- Adaptors
  - AMP-activated/SNFI protein kinase subfamily and, 828
  - nucleocytoplasmic transport and, 282-88, 294-96
  - ubiquitin system and, 437, 467
- Additive function
  - of localization elements
    - RNA localization in development and, 371
- Adenosine deaminase
  - enzymatic transition states and, 700, 707-9
- Adenosine monophosphate (AMP)
  - AMP-activated/SNFI protein kinase subfamily and, 821-51
- Adenosine triphosphate (ATP)
  - AMP-activated/SNFI protein kinase subfamily and, 821
- GroEL-mediated protein
  - folding and, 581-82, 584-85, 588-96, 598-600, 602-3, 605-6
- nucleocytoplasmic transport
  - and, 267
  - nucleosome structure and transcriptional regulation, 545, 567-73
  - ribonucleotide reductases and, 74, 76-78
  - TGF- $\beta$  signal transduction and, 760
  - transporters and, 49-66
  - ubiquitin system and, 426-28, 430-31, 444, 465, 470-71
- Adenosylcobalamin
  - ribonucleotide reductases and, 71-76, 81-83, 94
- S-Adenosyl-L-homocysteine
  - base flipping and, 182
- S-Adenosyl-L-methionine
  - base flipping and, 182
- S-Adenosylmethionine synthetase
  - enzymatic transition states and, 706-7
- Adenoviruses
  - interferons and, 238, 241, 244
- ADP-ribosylating toxins
  - enzymatic transition states and, 712-16
- Aequora victoria*
  - green fluorescent protein and, 509-41
- Aerobes
  - ribonucleotide reductases and, 71, 73-74, 76, 91
- A-form geometry
  - ribonuclease P and, 163
- African swine fever virus
  - ribonucleotide reductases and, 92-93
- Aggrecan
  - matrix proteoglycans and, 625-28
- Agonists
  - G protein-coupled receptor
    - kinases and, 653, 659-61
- Agrin
  - matrix proteoglycans and, 611, 613, 615, 621-23
- AHR nuclear transporter protein
  - circadian behavioral rhythms in *Drosophila* and, 138-39
- Alanine
  - AMP-activated/SNFI protein kinase subfamily and, 832-33, 841-42, 846
  - green fluorescent protein and, 515, 522-23
  - GroEL-mediated protein
    - folding and, 587, 604
  - HIV-1 life cycle and, 12-13
  - prion diseases and, 801
  - TGF- $\beta$  signal transduction and, 769
  - ubiquitin system and, 471
  - von Willebrand factor and, 407
- Alcaligenes eutrophus*
  - ribonucleotide reductases and, 90, 92-93
- Algae
  - circadian behavioral rhythms in *Drosophila* and, 139

- ALK1 receptor
    - TGF- $\beta$  signal transduction and, 783
  - Alka protein
    - base flipping and, 191-92
  - Allosteric regulation
    - AMP-activated/SNF1 protein kinase subfamily and, 830-32
    - enzymatic transition states and, 703
  - G protein-coupled receptor kinases and, 653, 672
  - GroEL-mediated protein folding and, 593
  - ribonucleotide reductases and, 71-72, 74, 76-77, 80, 84-86, 89, 94
  - von Willebrand factor and, 395, 407-8
- Alternative conformations
- nucleosome structure and transcriptional regulation, 545
- Alternative splicing
- RNA localization in development and, 367-68
- Alzheimer's disease
- prion diseases and, 794, 797
- Amino acids
- AMP-activated/SNF1 protein kinase subfamily and, 825, 832-33, 840-42, 844-46, 848
  - circadian behavioral rhythms in *Drosophila* and, 137, 144
  - DNA replication fork and, 730
  - Golgi and endoplasmic reticulum transporters, 59-60, 63-65
  - G protein-coupled receptor kinases and, 653-86
  - green fluorescent protein and, 512-15, 517-18, 521-29, 531, 536
  - GroEL-mediated protein folding and, 583, 587, 590, 593-94, 597-600, 604
  - history of research, xxix
  - HIV-1 life cycle and, 5-8, 10-22
  - interferons and, 228-32, 235-36, 238, 240, 243, 251, 253
  - matrix proteoglycans and, 609, 614-16, 622, 624, 626-27, 629, 634-45
  - nucleocytoplasmic transport and, 283
  - nucleosome structure and transcriptional regulation, 555-61, 564, 572
  - phosphoinositide kinases and, 486-92, 494, 500
  - prion diseases and, 799, 801, 803, 805, 810-13
  - ribonucleotide reductases and, 72-86, 89, 92-93
  - S. cerevisiae* sphingolipids and, 32, 34-35
  - TGF- $\beta$  signal transduction and, 757, 759-60, 763-69
  - ubiquitin system and, 426-28, 430, 432, 434-35, 439-41, 443, 445, 450, 453-57, 459-61, 463, 470-71
  - von Willebrand factor and, 400, 406-9
- 4'-Amino analog
- modified oligonucleotides and, 117
- Amino-methyltransferases
- base flipping and, 189-90
- 2-Aminopurine
- modified oligonucleotides and, 117
- AMP-activated/SNF1 protein kinase subfamily
- acetyl-CoA carboxylase, 843-44, 846
  - AMP-activated protein kinase kinase, 832-33
  - biochemistry, 837-38
  - Cat8, 848
  - characterization, 824-27
  - cloning, 824-27
  - downstream targets, 840-50
  - elements upstream of SNF1, 838-39
  - fatty acid oxidation, 843-44
  - genetics, 835-39
  - glycogen synthase, 845
  - higher plants, 828-29, 848-50
  - history, 823
  - HMG-CoA reductase, 842-43, 848-49
  - hormone-sensitive lipase, 844-45
  - introduction, 822-23
  - mammals, 823-24, 839-46
  - metabolism, 848-49
  - Mig1, 846-47
  - molecular characterization, 824-29
  - plants, 840-42
  - purification, 824-27
  - Raf-1 protein kinase, 845-46
  - recognition motif, 840-42
  - regulation, 829-30, 832-40
  - Sip3, 847
  - Sip4, 847
  - subunits, 824-27
  - transcription, 849-50
  - unifying hypothesis, 850-51
  - yeasts, 824, 827-28, 840-42, 846-48
- AMP deaminase
- enzymatic transition states and, 707-9
- AMP nucleosidase
- enzymatic transition states and, 703-6
- AMPPNP
- ribonucleotide reductases and, 77-78
- Anaerobes
- green fluorescent protein and, 530
  - ribonucleotide reductases and, 71, 73-74, 76, 91, 94
- Anaerobic photoconversion
- green fluorescent protein and, 529
- Analog design
- transition state, 693-718
- Anaphase inhibitors
- ubiquitin system and, 451-52
- Anchoring
- caveolae and, 199, 202, 206-10, 212-16, 218-19
  - GroEL-mediated protein folding and, 596
  - matrix proteoglycans and, 625, 629, 634
  - prion diseases and, 804
  - RNA localization in development and, 335, 362-64
  - S. cerevisiae* sphingolipids and, 42-45, 65
- Ancillary pathways
- interferons and, 227
- Aneuploidy
- circadian behavioral rhythms in *Drosophila* and, 137
- Anfinsen cage
- GroEL-mediated protein folding and, 600
- Ankyrin repeats
- interferons and, 243
- Annealing
- HIV-1 life cycle and, 13
- Anterior cell fate specification
- RNA localization in development and, 384-85
- Anterior-posterior axis
- RNA localization in development and, 335, 383-84
- Antheraea* sp.
- circadian behavioral rhythms in

- Drosophila* and, 138, 140-41
- Antibodies
- AMP-activated/SNF1 protein kinase subfamily and, 829, 832
- HIV-1 life cycle and, 12
- interferons and, 238, 250-51, 255
- matrix proteoglycans and, 621
- nucleocytoplasmic transport and, 279
- nucleosome structure and transcriptional regulation, 560
- phosphoinositide kinases and, 494
- prion diseases and, 806-7
- ribonuclease P and, 174
- Anticodons
- ribonuclease P and, 170
- Antigen processing/presentation
- interferons and, 248-49
- ubiquitin system and, 468-71
- Antiparallel helix
- ribonuclease P and, 159
- Antiporters
- Golgi and endoplasmic reticulum transporters, 49, 52-58, 63
- Antisense oligonucleotides
- ribonuclease P and, 177
- Apoptosis
- HIV-1 life cycle and, 19
- interferons and, 245, 247, 255-56
- ribonucleotide reductases and, 84
- S. cerevisiae* sphingolipids and, 28, 34, 41
- ubiquitin system and, 425-26, 467-68
- Aqueous channels
- nucleocytoplasmic transport and, 265-300
- Arabidopsis thaliana*
- AMP-activated/SNF1 protein kinase subfamily and, 829, 848-49
- circadian behavioral rhythms in *Drosophila* and, 136
- Archaea
- DNA replication fork and, 726
- GroEL-mediated protein folding and, 586
- ribonuclease P and, 153, 156-59, 161-63, 173, 176
- ribonucleotide reductases and, 92
- Archaeobacteria
- ribonucleotide reductases and, 73-74, 76, 90
- ubiquitin system and, 428, 441-42
- Archaeoglobus fulgidus*
- ribonucleotide reductases and, 90, 92-93
- Arginine
- AMP-activated/SNF1 protein kinase subfamily and, 842
- green fluorescent protein and, 512-13, 515, 526
- HIV-1 life cycle and, 6-7, 10, 12-13, 15
- nucleosome structure and transcriptional regulation, 572
- prion diseases and, 811-12
- ubiquitin system and, 460
- von Willebrand factor and, 406-9

 AMP-activated/SNF1 protein kinase subfamily and, 821, 843-44  
*S. cerevisiae* sphingolipids and, 30, 33, 35, 43-45  
 FEN1 polypeptide  
 DNA replication fork and, 732-33, 735-36  
 Fibrillogenesis  
 collagen  
 matrix proteoglycans and, 609, 640-42  
 Fibroblast growth factor 2 (FGF-2)  
 matrix proteoglycans and, 619-21, 644  
 Fibroblasts  
 AMP-activated/SNF1 protein kinase subfamily and, 823  
 interferons and, 239, 241, 246  
 Fibromodulin  
 matrix proteoglycans and, 634-35  
 Finger-like loops  
 ribonucleotide reductases and, 77  
 Finger subdomain  
 HIV-1 life cycle and, 8, 20  
 Fission  
 ubiquitin system and, 446, 450-52  
 5'-leader elements  
 precursor tRNA  
 ribonuclease P and, 153-55, 160-61, 163-64, 166-72, 174, 176-77  
 5'-untranslated region  
 matrix proteoglycans and, 638  
 FKBP12 protein  
 TGF- $\beta$  signal transduction and, 767  
 Flaps  
 HIV-1 life cycle and, 7  
 Flavodoxin  
 ribonucleotide reductases and, 83-84  
 FLICE proteases  
 interferons and, 245  
 Flipping  
 base, 181-97  
 Fluid shear stress  
 von Willebrand factor and, 395, 408-10  
 Fluorescence  
 green fluorescent protein and, 509-41  
 Fluorescence resonance energy transfer (FRET)  
 green fluorescent protein and, 534-40  
 modified oligonucleotides and, 125  
 Fluorescent labels  
 modified oligonucleotides and, 121-22  
 5-Fluoro-2'-deoxycytidine  
 base flipping and, 184-85  
 Fluorophore  
 internal

- green fluorescent protein  
and, 509
- FMN  
ribonucleotide reductases and,  
83

- Golgi and endoplasmic  
reticulum transporters,  
53  
green fluorescent protein and,  
517-18, 521-22  
GroEL-mediated protein  
folding and, 593, 599  
interferons and, 242, 253,  
255  
matrix proteoglycans and,  
642  
prion diseases and, 794-96,  
800-3  
ubiquitin system and, 449, 457,  
463
- ## X
- Xanthine triphosphate (XTP)  
nucleocytoplasmic transport  
and, 277
- X chromosome  
circadian behavioral rhythms in  
*Drosophila* and, 133  
matrix proteoglycans and,  
640
- Xenobiotic factors  
circadian behavioral rhythms in  
*Drosophila* and, 138
- Xenopus laevis*  
DNA replication fork and,  
726  
HIV-1 life cycle and, 10  
nucleocytoplasmic transport  
and, 270, 284, 286, 290,  
293  
nucleosome structure and  
transcriptional regulation,  
547  
ribonuclease P and, 157, 176  
RNA localization in  
development and, 335-38,  
340-41, 348-52, 366-67,  
369-70, 374, 376-77,  
382-88  
TGF- $\beta$  signal transduction and,  
755, 758, 765, 769-71  
ubiquitin system and, 430, 436,  
439, 446, 457  
von Willebrand factor and,  
414
- Xlsirt protein  
RNA localization in  
development and, 382
- X-ray crystallography  
base flipping and, 181-82  
green fluorescent protein and,  
509, 515-17, 521, 524,  
530-31, 534  
GroEL-mediated protein  
folding and, 585, 587, 590,  
593-96, 600  
HIV-1 life cycle and, 11, 15-16,  
18  
modified oligonucleotides and,  
125  
nucleosome structure and  
transcriptional regulation,  
545  
ribonuclease P and, 164, 176  
ribonucleotide reductases and,  
71, 76-77, 80, 94  
TGF- $\beta$  signal transduction and,  
760-61  
ubiquitin system and, 441-42  
von Willebrand factor and,  
408
- Xylose  
Golgi and endoplasmic  
reticulum transporters,  
52-53, 56, 59, 61
- ## Y
- YCK genes  
*S. cerevisiae* sphingolipids and,  
40

## YC RNA

RNA localization in  
development and,  
382

## Yeasts

AMP-activated/SNF1 protein  
kinase subfamily and, 822,  
824, 827-28, 833, 840-42,  
846-49

circadian behavioral rhythms in  
*Drosophila* and, 143

DNA replication fork and,  
723-24, 726, 728, 731-33,  
736, 739, 741-43

Golgi and endoplasmic  
reticulum transporters,  
49-50, 52-53, 55, 57-59,  
61-63, 66

green fluorescent protein and,  
529

interferons and, 243, 255

nucleocytoplasmic transport  
and, 275-76, 279, 282,  
288-300

nucleosome structure and  
transcriptional regulation,

555, 559, 561-62, 566-68,  
572

phosphoinositide kinases and,  
481, 491-92, 494-95, 497,  
503

ribonuclease P and, 157-59,  
161, 173-75

ribonucleotide reductases and,  
79, 88-89, 92-93, 95

RNA localization in  
development and, 335,  
341, 366, 373, 388

small G proteins and, 307-29

sphingolipids and, 27-45

TGF- $\beta$  signal transduction and,  
767

ubiquitin system and, 428-29,

434, 436, 441-42, 444,  
446-52, 459-60, 462-63

YMXM motifs

phosphoinositide kinases and,  
488-89

Yrb2p/RanBP3

nucleocytoplasmic transport  
and, 278-79

YSR2 gene

*S. cerevisiae* sphingolipids and,  
31

## Z

## ZDS genes

small G proteins in yeast  
growth and, 328

## Zebrafish

RNA localization in  
development and, 335,  
341, 353

## Zinc cluster protein

AMP-activated/SNF1 protein  
kinase subfamily and, 848

## Zinc fingers

AMP-activated/SNF1 protein  
kinase subfamily and, 846

base flipping and, 182

circadian behavioral rhythms in  
*Drosophila* and, 138-39

TGF- $\beta$  signal transduction and,  
778

Zn<sup>2+</sup>

HIV-1 life cycle and, 7  
prion diseases and, 813
